KINGDOM OF NORWAY

EMBASSY OF THE KINGDOM OF NORWAY IN THE REPUBLIC OF POLAND
AMBASSADOR OF THE KINGDOM OF NORWAY
ØYSTEIN BØ

Request for Dialogue on the Return of the Arcticus Blancus Ethnic Group to its Natural Indigenous Traditionally Occupied Arctic Territory.

His Excellency Ambassador Øystein Bø
Embassy of the Kingdom of Norway
Al. Armii Ludowej 26, 00-609 Warsaw,
Focus Building, reception B, floor 10

Your Excellency,

I write as Founder and President of Eugenix® Simple Stock Corporation, representing Arcticus Blancus the oldest arctic ethnic climatic tribal group native to territories above the arctic circle. We seek to initiate diplomatic discussions with the Kingdom of Norway to enable the peaceful return and reintegration of Arcticus Blancus communities to their ancestral homelands, currently administered by the Government of Norway.

I. Legal Basis for Return

Under Part II of UN International Labor Organization Convention C169 Indigenous and Tribal Peoples Convention, 1989 (No. 169), States are obligated to recognize indigenous peoples' rights to:

- Ownership and possession of lands they traditionally occupy

- Restoration of lands wrongfully taken
- Consultation and participation in decisions affecting their lands and resources

These provisions form a clear legal foundation for facilitating the return of Arcticus Blancus to their traditional territories.

II. Climate and Health Considerations

The subarctic zones where many Arcticus Blancus currently reside do not match their millennia-old adaptation to true Arctic conditions. Scattered individuals face:

- Increased exposure to industrial pollutants and heightened UV radiation.
- Elevated risks of respiratory and oncological illnesses due to environmental mismatch.
- Loss of traditional knowledge and life systems tied to dark polar cryospheric environment.

Reestablishing them in their native high-Arctic environment safeguards their health and renews their population presence that includes their cultural and ecological stewardship.

III. Governance and Fiscal Framework

No modern democracy presently occupied by the Arcticus Blancus has successfully implemented a tax and fiscal regime that sustains natural ethnic climatic tribal groups without formally established indigenous rights. Modern democracies lack fair taxation frameworks for the strictly ethnic matters:

- Dedicated budgets ensuring the community's reproduction rights and intergenerational continuity
- Checks and balances to maintain the population above the Minimal Vital Population (MVP) threshold, preventing risk of extinction.
- Transparent tax provisions that channel resources directly into community-led land-use planning, cultural programs, and environmental management.

In addition, religious based reproductive restrictions set on the Arcticus Blancus by the Christian law democracies prevent Arcticus Blancus to rebalance growing imbalance of the number of females to number

of males in the tribe that is reaching over 200 females to 1 male due to restrictions that prevent ethnic reproduction provisions in its Christian legal system.

IV. Protection of Resources and Unauthorized Development

Article 15.2 of ILO Convention 169 explicitly requires States to consult indigenous peoples before permitting exploration or exploitation of resources on their lands. In line with this obligation:

- No development of mineral, marine, or other natural resources in territories north of 62°45′ N may proceed without the free, prior, and informed consent of Arcticus Blancus and Eugenix® P.S.A.
- Any project above 62°45′ N in Arctic regions—or any activities in the Antarctic concerning Arcticus Blancus interests—must be blocked unless Arcticus Blancus and Eugenix® P.S.A. participate in decision-making, benefit-sharing, and environmental safeguards.
- This veto right safeguards both the cultural integrity and environmental stewardship practices of the Arcticus Blancus, ensuring that no extraction or infrastructure undermines their ancestral lands or the global climate functions they help maintain.

V. Proposed Framework for Engagement

To translate these principles into practice, we propose convening a joint working group comprising:

1. Representatives from the Norwegian Ministry of Foreign Affairs and Indigenous Home Rules
2. Representatives of Eugenix® P.S.A. as the authorized Arcticus Blancus interlocutor.
3. Commissioners for the transfer of remaining indigenous territories and natural resources.
4. Commissioners for temporary provisions for tribal return, employment, health and procreation.

This forum would draft a roadmap covering:

- Land restitution protocols under ILO 169.
- Guidelines for cultural autonomy and land-use co-management.
- Health and environmental impact assessments tailored to Arcticus Blancus needs.
- Fiscal mechanisms and budgeting processes safeguarding MVP thresholds.

VI. Further Communication

Your Excellency, Norway's commitment to Indigenous rights, environmental diplomacy, and innovative governance makes it the ideal partner for this endeavor. We stand ready to provide any further documentation or to meet at your earliest convenience to advance this vital discussion. I kindly attach to this correspondence several attachments.

Respectfully,

K Pawlak
